

### Seal Rebuilding Kit Tools

Seal rebuild kits are a big cost savings value over replacing functional swivels that have worn seals. Each product page lists corresponding rebuilding kits for that swivel.

#### To simplify replacement of worn seals we offer these tools:

**Seal Installation Cone;** you simply slide your replacement seals over the cone, then slide them over your existing swivel. No twisting and fumbling with new seals trying to get them over the swivel.

**Seal Resizing Ring;** after the replacement seal is in position use the ring to reshape and size the seal when in place.

**For use with Swivel Item #:**  
15009, 15010, 24022, 24059,  
24073, 24074, 24089

#### Seal Installation Cone

**T-PB12-Cone**  
Item #11025

#### Seal Resizing Ring

**T-PB12-Ring**  
Item #11028

#### For use with Swivel Item #:

23048, 23113, 23152

#### Seal Installation Cone

**T-PB8-Cone**  
Item #11021

#### Seal Resizing Ring

**T-PB8-Ring**  
Item #11022

#### For use with Swivel Item #:

16050, 25061

#### Seal Resizing Ring

**T-PB16-Ring**  
Item #11030

#### Seal Installation Cone

**T-PB16-Cone**  
Item #11029
