

Rodless Cylinders Series 50

Double-acting, magnetic, cushioned
 ø16, 25, 32, 40, 50, 63, 80

- » Four ports on each chamber
- » Possibility to supply both chambers from one side (on request)

The Series 50 rodless cylinders are available in 7 different diameters to cover as many applications as possible. A permanent magnet is assembled on the cylinder piston allowing the position to be detected by means of proximity switches positioned on the sliding axis. This series of cylinder is normally supplied with end-stroke cushioning, that can be regulated by means of a screw located on the end-cover.

The Series 50 cylinders are recommended to be used according to the load values and torque forces detailed in the relative tables.

GENERAL DATA
